Lovell Industries is a manufacturing company specializing in thermoformed Food Contact Blisters/containers (APET/RPET/HIPS), Die cut Food Contact Packaging (APET/RPET), Die cut Non-Food Contact Packaging (APET/RPET) & Non-Food contact Blisters/Containers.

Lovell Industries is committed to ensuring that all the products meet quality and food safety requirements in accordance with FSSC22000 (ISO22002/ TS-4:2013 & ISO22000:2005).

Lovell Industries commits to comply with the requirements of all regulatory and statutory requirements and establishing, maintaining, documenting & improving a quality and food safety management system while embracing the following principles.

- Customer Focus –satisfying our customers with packaging that consistently conform to agreed specifications
- Leadership – setting objectives and implementing an effective quality and food safety management system
- Participation of People – actively encouraging and supporting the involvement of people at all levels, working together to continuously improve the quality and food safety management system
- Continuous Improvement and Innovation – Continuously innovating to exceed market expectations of the quality and food safety system
- Supplier Partnering – establishing mutually beneficial, long term partnerships with suppliers
- Interactive Communication – ensuring effective channels of communications within the organization and with all stakeholders such as suppliers, customers and service providers
- Systems Approach – implementing and maintaining a documented Quality and food safety management system
- Factual approach to decision making – the identification of hazards, the assessment of risks and where appropriate taking reasonable steps to control, minimize or eliminate those risks on an ongoing basis.

The Quality & Food Safety policy shall be reviewed at least annually for continued suitability, relevance and effectiveness in the Quality management review meeting. It is communicated through training and is displayed in strategic places throughout the whole facility.
